Information on the Notes

Merrill Lynch & Co., Inc. (the "Issuer") has issued Accelerated Return Notes ("Notes") linked to the Russell 2000 Index (the "Index"). The Notes were priced at \$10 each and mature on November 7, 2008. The Notes do not offer principal protection.

As more fully set forth in the Prospectus Supplement, the Notes provide full exposure to any downside movement in the Index and triple exposure to any upside movement in the Index, subject to at maximum payment at maturity of \$12.499 per unit. Also, each \$10 principal amount of the Notes will be deemed a "Unit" for purposes of trading and transfer. There will be no payments or redemptions prior to the maturity date.

At maturity, investors will receive:

- 1) If the Ending Value is less than or equal to the Starting Value, the investor receives:
 - i. $\$10 \times (\text{Ending Value} / \text{Starting Value})$; or
- 2) If the Ending Value is greater than the Starting Value, the investor will receive:
 - i. $\$10 + [\$30 \times ((\text{Ending Value} - \text{Starting Value}) / \text{Starting Value})]$

Payment at maturity is subject to a maximum of \$12.499 per unit.

The Starting Value for the Index is 787.32. The Ending Value of the Index will be determined shortly before the maturity date.

Since all payments which may be due to holders of the Notes are the sole responsibility of the Issuer, it is the credit of Merrill Lynch & Co., Inc., which stands behind the Notes.

It is expected that the market value of the Notes will depend substantially on the value of the Index and may be affected by a number of other interrelated factors including, among other things: the general level of interest rates, the volatility of the Index and the stocks comprising

the Index, the time remaining to maturity, the dividend yields of the stocks comprising the Index, and the credit ratings of the Issuer.

The Trustee for the securities is The Bank of New York.
