Nasdaq Co-Location and Connectivity Services

CoLo & Connectivity Console Authorization Form

Creating a Console Account allows Customer to provide relevant customer billing, contact and account information, to review and accept the terms on which Services are provided, and to establish authorized users to place Service orders and manage Services via the Console. To create a Console Account, Customer must complete and sign and return this Console Account Authorization Form to Nasdaq. Failure to sign or supply accurate, current and complete answers on the Console Account Authorization Form may prevent Customer's Console Account from being established.

Each authorized user is responsible for safeguarding his/her password. Authorized users must not disclose passwords to any third party. Customers must immediately notify Nasdaq of any unauthorized use of their Console Account.

Customer Information

Customer / Firm Name:	
Customer / Firm Primary Office Address: (include city, state (US only), country, zip/post code)

Where Customer has indicated above that a user should have 'Full Permission', Customer authorizes that user to place or terminate Orders on behalf of Customer. Where Customer has indicated above that a user should have 'Read-Only' access, Customer authorizes that user to view orders and account details only.

All Orders and instructions submitted via the Colo & Connectivity Console are subject to the terms and conditions of the Nasdaq Co-Location Agreement or Co-Location & Connectivity Agreement applicable for the region in which your services are located.

By executing this Authorization Form, Customer represents that the above information is true and correct and requests Nasdaq to act on the instructions set out above.
