Subject: Order Delivery

The Exchange is issuing this Regulatory Information Bulletin to expand the time period in which Equity EAMs may respond to an execution request from the System for an order submitted on an order delivery basis.

Previously, the System would automatically cancel a limit order designated for order delivery treatment if no response was received from the Equity EAM within 250 milliseconds. The Exchange is now expanding this response time so that the System will cancel a limit order designated for order delivery treatment if no response is received from the Equity EAM within 500 milliseconds.
