Overview

Web Service Reports

The NFN Daily List is a web-based data product offered by Nasdaq Information, LLC. The NFN Daily List is designed to provide the market data community with issue level security details for NFN instruments. This Nasdaq product includes NFN-related reports:

1. **NFN Daily List:** This component provides advance notification of NFN registration actions such as new instruments, deleted instruments and instrument attribute changes. For the Daily List component, Nasdaq will generate two daily files:
 - a. **Daily List – Advance Notifications:** This file will include all NFN registration actions that were approved by NFN Operations on the current business date for a future System effective date.
 - b. **Daily List – Next Business Day Changes:** This file provides only those NFN registration actions scheduled to take effect on the next business date.
2. **Instrument Directory:** This component file provides security level information for all active instruments in the NFN system at the beginning of the current business day.
3. **Root Directory:** This component provides fund level information for instruments as provided by NFN Issuers. This directory updates every day at the beginning of the current business day.
4. **Issuer Directory:** This component provides a list of all active NFN issuers and the applicable issuer data such as Issuer Description, Assets Under Management, Investor Relations contact information, etc. This directory updates in real time.
5. **Documentation Posting Service:** Nasdaq allows NFN issuers to post prospectus, statements of additional information (SAI), semi-annual and annual reports, and money market monthly financial statements in PDF format for market data vendors to access. Each day, Nasdaq will generate a file defining new NFN documents available for download.
6. **Ex Date Report:** Nasdaq allows NFN pricing agents to enter advance notifications of Dividend/Interest and Capital Distribution actions. To ensure that the market data community can access these corporate actions on the appropriate ex-date, Nasdaq plans to add an Ex-Date report to the NFN web product.

Please note that the NFN Daily List includes CUSIP numbers. Firms must have an agreement in place with the CUSIP Bureau and appropriate NFN entitlement token in order to see the CUSIP values within the NFN files.

Secured Website Access

Nasdaq offers NFN website access to NFN Daily List subscribers. Through the NFN website, firms may download all the reports listed above. In addition, Nasdaq will offer the following functionality via the NFN website:

- Search capabilities for the Instrument Directory and Daily List products.
- Ability to view intra-day NFN reporting statistics.
- Ability to download monthly NFN reports such as Instrument counts by pricing agent, Instrument counts by issuer, Updates by instrument type and Updates by time interval.

Firms should be able to log into the NFN website at <https://nfn.nasdaq.com> to take advantage of the new functionality. For details on the NFN website functionality, please reach out to [NFNOps@nasdaq.com](mailto:NFNops@nasdaq.com).

Architecture

General Information

As of **November 22, 2021**, Nasdaq will allow NFN – Nasdaq Fund Network users to use JWT bearer token to call valuation reports.

In addition, NFN adopted MFA – Multi-Factor Authentication to access the NFN Web Service. NFN Data Service Valuation Report users no longer require valid security certificate. Please contact [Nasdaq Trading Services](#) at +1 212 231 5180 if you need assistance enrolling into MFA or password reset.

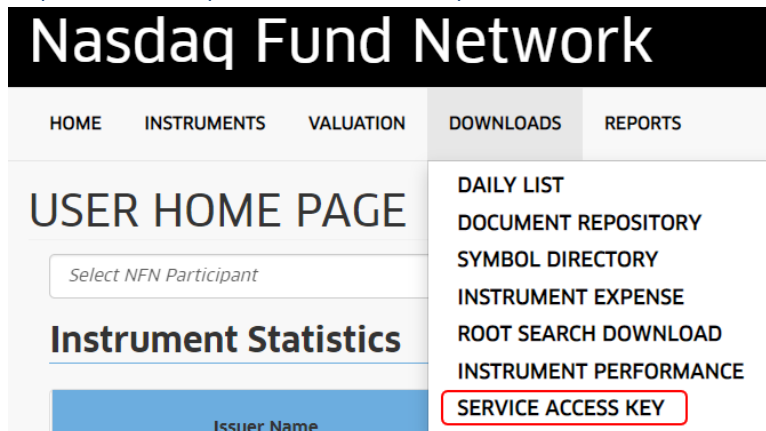

Please visit <https://nfn.nasdaq.com> and follow instruction to enroll in MFA logon.

Follow these steps to generate JWT bearer token:

First, users need to generate permanent access key which will be used to generate temporary JWT bearer token later. This access key will expire after one year.

- Login to NFN Web Service and navigate to Download → Service Access Key page <https://nfn.nasdaq.com/ServiceAccess.aspx>

- Click Generate Service Access Key button as shown in the following screenshot
- System will generate a Current Active Key as shown below
- Copy the Current Active Key

Second, to generate temporary JWT token:

- End point URL: <https://nfn.nasdaq.com/servicecall/tempession>
- Http method: POST
- Content-Type should be "application/x-www-form-urlencoded"
- Form field: username, password, accesskey
- Enter username, password and paste the accesskey copied from the NFN Web Service in step one.
- Expected output: JSON {"data": "[JWT value]"}
- Sample output
{"data": "eyJhbGciOiJIodHRwOi8vd3d3LnczLm9yZy8yMDAxLzAOL3htbGRzaWctbW9yZSNobWFjLXNoYTI1NiIsInR5cCI6IkpXVCJ9.eyJsb2FkIjoizTI2SUVidHNMNIBxbC9veGMvaHp6WDhCMWVNVm8ydGRaVFA5YkNlc1NRS0pFbnpyWExJanVBK282RE9XR085ciJ9.L9ZjysPJgB9tiYtuDAcUdFTSxPIITpUTMnc_QBovH-M"}
- Temporary token will expire in 30 minutes of inactivity

The NFN Registration Service data files will be accessible to subscribers via Secured Web Service. In order to access the files, NFN Daily List subscribers must have a valid access key, user ID and password from Nasdaq.

Nasdaq strongly recommends that firms create web service calls to retrieve the NFN Daily List and NFN Instrument Directory files.

Nasdaq has modified the authentication process for fetching files from the NFN Secure Web Service.

All programmatically generated calls should contain client access key issued by Nasdaq

For security reasons, Nasdaq recommends that firms access the NFN web services via "POST" (user credentials passed via form post) method. The following is an example call that can be used to retrieve files:

Sample code calls

The following is an example call that can be used to retrieve files:

Sample code call in Powershell:

Add-Type -AssemblyName System.Web

Step One Establish Temp Session and retrieve JWT#####

\$username = "*****"

\$password = "*****"

NFN Daily List

```
$accesskey = "*****"
$url="https://nfn.nasdaq.com/servicecall/tempsession"
$body = @{}
$body.add("username",$username)
$body.add("password",$password)
$body.add("accesskey",$accesskey)

## It is assumed that correct credentials used no error checking is provided

$response = (Invoke-WebRequest -Uri $url -ContentType "application/x-www-form-urlencoded" -Body $body -
Method POST -UseBasicParsing).Content | ConvertFrom-Json

$json = $response.data

##Write-Output $json

##### Step Two configure and make call to the service #####
##### In this case we are using valuation service and write output in temp file #####

$dict=@{}
$dict.add("Content-Type", "application/json")
$dict.add("Authorization", [string]::Format("Bearer {0}", $json))

curl -Headers $dict "https://nfn.nasdaq.com/servicecall/InstrumentDirectory.ashx?Date=11-29-2010&Type=pipe"
-o "c:\temp\temp.txt"
```

Sample code call in Python

```
## Imports
import requests
```

```
import json

## Put Login Details

username='*****'

password='*****'

accesskey='*****'

# Authenticate

url_new = "https://nfn.nasdaq.com/servicecall/tempsession"

payload = {'username': username, 'password': password, 'accesskey': accesskey}

headers = {'Content-Type': 'application/x-www-form-urlencoded'}

response = requests.post(url_new, data=payload, headers=headers)

#extract JWT

data = json.loads(response.text)

jwt_token=data['data']

url='https://nfn.nasdaq.com/servicecall/DLNextDay.ashx?type=CSV'

headers = {'Content-Type': 'application/json', 'Authorization': 'Bearer ' + jwt_token}

response = requests.request('GET', url, headers=headers)

## Work with response

print(response.text)
```

In the sample code above, clients need to make the necessary adjustments in the highlighted text. For example, client should replace username and password with their unique assigned logon credentials from Nasdaq. Clients also need to present an Access key. Clients should replace the code report parameters as needed.

End Point: RefreshKey

- NFN has added an endpoint for Users to refresh their Service Access Key via POST.
- To Create initial Access key user still needs install TOTP app on the phone and generate Access key using same process they are using now.
- New end point is: <https://nfn.nasdaq.com/servicecall/refreshkey>.
- In order to use endpoint above, the user must establish session by Posting username, password, VALID not Expired Access Key (<https://nfn.nasdaq.com//servicecall/tempsession>)
- No parameters post to <https://nfn.nasdaq.com/servicecall/refreshkey> should be done. Post should have Authorization header with Valid not Expired bearer JWT token generated in temp session call.

In response user will receive following data:

```
{  
  
  "Key": "1IOX0Uvrhx0I8iHbv0k79N3clmV3b0RdUdmP1Adt5DLRqW8kv6tTgi9PPAHvRR3Wg7STtG7/Ohnu+zXJ0wC  
GbQ==",  
  
  "Expired": "2024-02-01T15:04:09.5092681-05:00"  
}
```

IMPORTANT NOTES:

- This will need to be done by the user **PRIOR** to the current Access Key expiring. If the current key has expired the user will have to log in to <https://nfn.nasdaq.com> using MFA and regenerate the Access Key manually.
- Once refreshed, the previous Access Key will be invalidated. If the user did not save new Access Key, the user will have to login to <https://nfn.nasdaq.com> using MFA and retrieve/regenerate the Access Key manually.
- Once the new Access Key is generated, the temporary session used to do so will be terminated. The user will need to re-establish new session using new Access key.

Hours of Operation

The NFN web service reports outlined in this document are available for download from Monday mornings at 12:00 a.m., Eastern Time (ET) through Friday evenings at 11 p.m., ET.

The NFN posting times for each report are as follows:

Report Name	Initial Posting Time	Final Posting Time	Notes
NFN Daily Lists – All Versions	Between 11:00 a.m., ET and 1 p.m., ET	6:00 p.m., ET	Nasdaq attempts to post file by 12 noon, ET. After initial posting, Nasdaq attempts to limit the NFN Daily List changes to corrections only.
Instrument Directory	7:00 a.m., ET		Since the NFN Symbol Directory contains only active instruments, it is rare for the contents to change intraday.
Ex-Date Report	8:00 a.m., ET	8:05 p.m., ET	Nasdaq dynamically updates the Ex-Date report as pricing agents enter dividend and capital distribution data into the NFN system. For the most complete data, Nasdaq recommends that firms pull the report after 8:05 p.m., ET

Release Notes

Upcoming Changes

There are no upcoming changes as of this update (December 20, 2023).

Past Changes

On or about **April 24, 2023**, Nasdaq will add the Distribution Frequency value indicated below:

Code	Value
D	Distributes on Termination

NFN Daily List(s)

Web Service Parameters

To retrieve the NFN Directory, Web Service Users shall need to enter a call with the following parameters:

- **Daily List File Name:** As noted below, Nasdaq offers two versions of the NFN Daily List. User should specify “DLAdvance” or “DLNextDay”.
- **Date of Daily List:** Data should be entered in MM-DD-YYYY or MM/DD/YYYY format.

NFN Daily List

- **Symbol for Daily List:** Data should be 5-11 characters, following the symbol format requirements.
- **File Type:** Data should indicate requested file format. Options: “XML” for XML formatted text, “pipe” for pipe (|) delimited text, “CSV” for CSV formatted text, or “JSON” for a JSON format.

<https://nfn.nasdaq.com/servicecall/DLAdvance.ashx?Date=MM-DD-YYYY&Type=pipe>

<https://nfn.nasdaq.com/servicecall/DLNextDay.ashx?Date=MM-DD-YYYY&Type=pipe>

<https://nfn.nasdaq.com/servicecall/DLAdvance.ashx?Symbol=XXXXXXXXXX&Type=pipe>

<https://nfn.nasdaq.com/servicecall/DLNextDay.ashx?Symbol=XXXXXXXXXX&Type=pipe>

<https://nfn.nasdaq.com/servicecall/DLAdvance.ashx?date=MM-DD-YYYY&type=pipe&symbol=XXXXXXXXXX>

<https://www.nfn.nasdaq.com/servicecall/DLNextDay.ashx?date=MM-DD-YYYY&type=pipe&symbol=XXXXXXXXXX>

NFN Daily List File Format

Each business day, Nasdaq will post two NFN Daily List files with the same basic file format:

- **NFN Daily List – Advance Notifications:** This file will include all NFN registration actions that were approved by NFN Operations on the current business date regardless of the effective date. This advance notification file will be stored as a pipe-delimited text file. For the Web Service file name parameter, please use **DLAdvance**.
- **NFN Daily List – Next Business Day Changes:** This file provides only those NFN registration actions scheduled to take effect on the next business day. This next day file will be stored as a pipe-delimited text file. For the Web Service file name parameter, please use **DLNextDay**.

The file format for both files will be the same. The NFN Daily List files will include a message header row with the field headings. Following the message header row, the individual security-level records will be sorted in ascending order by System Effective Date and then ascending alphabetic order by Symbol field.

As the last record in the file, the system will provide the Web Service parameters as well as the Note for the Day.

Security Level Details

Data Field	Field Format	Description			
Posting Date	Date, MM/DD/YYYY	Denotes the date on which the NFN Daily List record was generated. Date field is stored in MM/DD/YYYY format.			
Posting Time	Time, HHMMSS	Denotes the time that the NFN Daily List entry was generated or last updated. The time will be stated in HHMMSS format. The time is based on US Eastern Time.			
System Effective Date	Date, MM/DD/YYYY	Denotes the date that the NFN instrument registration change will be effective in the NFN system. Date field is stored in MM/DD/YYYY format.			
Event Code	Text up to 50 bytes	Indicates the type of registration action associated with the NFN instrument. Allowable values are: <table border="1" style="margin-left: 20px;"> <thead> <tr> <th>Event Codes</th> </tr> </thead> <tbody> <tr> <td>Addition</td> </tr> <tr> <td>Deletion</td> </tr> </tbody> </table>	Event Codes	Addition	Deletion

NFN Daily List

Data Field	Field Format	Description						
Notes for Daily List Record	Text up to 300 bytes	<p>Denotes any special processing notes from NFN Operations related to the NFN instrument's action.</p> <p>Please note that it is Nasdaq's practice for the NFN Operations team to populate this notes field for corrected actions, withdrawn actions and restore actions.</p> <p>Please also note that it is Nasdaq's practice to show the most recent note associated with the instrument action on the Next Day version of the NFN Daily List.</p>						
Model Portfolio	1 bytes, Alpha	<p>Denotes that the Instrument is a Model Portfolio. Allowable values are:</p> <table border="1" data-bbox="880 646 1308 846"> <thead> <tr> <th>Code</th> <th>Value</th> </tr> </thead> <tbody> <tr> <td>Y</td> <td>Yes. The instrument is a Model Portfolio.</td> </tr> <tr> <td>N</td> <td>No. The instrument is not a Model Portfolio.</td> </tr> </tbody> </table> <p>The processing rules by action are as follows:</p> <ul style="list-style-type: none"> • For addition actions, this field will reflect the Flag for the instrument being added. • For replacement actions, this field will reflect the Flag for the instrument being added. • For attribute change actions, this field will reflect the Flag as of the Corporate Action Date. • For deletion actions, this field will not be populated. • For restore actions, the field will reflect the Flag for the instrument being reinstated to the NFN system. <p>Please note that Nasdaq will populate this field as "N" if not provided by the Issuer.</p>	Code	Value	Y	Yes. The instrument is a Model Portfolio.	N	No. The instrument is not a Model Portfolio.
Code	Value							
Y	Yes. The instrument is a Model Portfolio.							
N	No. The instrument is not a Model Portfolio.							

Closing Record

Data Field	Field Format	Description
Parameter	40 characters, alphanumeric (including special characters)	<p>Restatement of the file query parameter as entered by the user.</p> <p>Daily List File Name: DLAdvance or DLNextDay</p> <p>Date of Daily List: MM/DD/YYYY</p>
Note for Day	Text up to 300 bytes	Denotes any special processing notes from NFN Operations for the current business day that are not NFN instrument specific.

Event Code Descriptions

As noted above, each NFN Daily List record includes an Event Code to denote the type of record change that is being reported. In the table below, Nasdaq outlines how the Event Codes will be generated.

Event Codes	Event Description	Daily List Version	Daily List Processing Notes
Addition	A new NFN registration application submitted with final documentation	Advanced Notification Next Day	Supported on all versions of Daily List files. On the Advanced Notification list, NFN Operations will post an Addition record as soon as it notified of the planned action. If the issuer changes its plans, NFN Operations may post multiple Addition records to the Advanced Notification list. On the Next Day list, NFN will only show the final Addition record.
Deletion	A delete instrument request for an existing NFN instrument	Advanced Notification Next Day	Supported on all versions of the Daily List files. On the Advanced Notification list, NFN Operations will post a Deletion record as soon as it notified of the planned action. If the issuer changes its plans, NFN Operations may post multiple Deletion records to the Advanced Notification list. On the Next Day list, NFN will only show the final Deletion record.
Replacement	A combined action in which a firm is adding a new instrument at the same time as it is deleting an expiring instrument	Advanced Notification Next Day	Supported on all versions of Daily List files. On the Advanced Notification list, NFN Operations will post a Replacement record as soon as it notified of the planned action. If the issuer changes its plans, NFN Operations may post multiple Replacement records to the Advanced Notification list. On the Next Day list, NFN will only show the final Replacement record.
Attribute Change	A modification to one of the security attributes for a live NFN instrument. Firms should compare current and new field values to determine the fields impacted by the change request.	Advance Notifications Next Day	Supported on all versions of Daily List files. Corporate Action Date = Date NFN Issuer reported that the security change action was instituted on its end. On the Advanced Notification list, NFN Operations will post an Attribute Change record as soon as it notified of the planned action. If the issuer changes its plans, NFN Operations may post multiple Attribute Change records to the Advanced Notification list.

NFN Daily List

			On the Next Day list, NFN will only show the final Attribute Change record.
Restore	A reversal of a NFN instrument deletion.	Advanced Notification Next Day	If an instrument is removed from the NFN system in error, Nasdaq will use the Restore event code to reverse the Deletion action. Given that most firms want to resume pricing of an instrument as quickly as possible, the Restore records should always appear in the Next Day file.
Withdraw – Addition	A cancellation of a previously announced Addition to the NFN system.	Advanced Notification Next Day	As noted above, Nasdaq will be adding Withdraw event codes to notify the vendor community of a cancelled NFN listing action. The Withdraw event should always appear on the Advanced Notification list. The Withdraw event will only appear on the Next Day list, however, if the issuer waits to the last minute to notify NFN Operations of the cancelled action.
Withdraw – Deletion	A cancellation of a previously announced Deletion from the NFN system.	Advanced Notification Next Day	As noted above, Nasdaq will be adding Withdraw event codes to notify the vendor community of a cancelled NFN listing action. The Withdraw event should always appear on the Advanced Notification list. The Withdraw event will only appear on the Next Day list, however, if the issuer waits to the last minute to notify NFN Operations of the cancelled action.
Withdraw – Replacement	A cancellation of a previously announced Replacement action on the NFN system.	Advanced Notification Next Day	As noted above, Nasdaq will be adding Withdraw event codes to notify the vendor community of a cancelled NFN listing action. The Withdraw event should always appear on the Advanced Notification list. The Withdraw event will only appear on the Next Day list, however, if the issuer waits to the last minute to notify NFN Operations of the cancelled action.
Withdraw – Attribute Change	A cancellation of a previously announced Attribute Change.	Advanced Notification Next Day	As noted above, Nasdaq will be adding Withdraw event codes to notify the vendor community of a cancelled NFN listing action. The Withdraw event should always appear on the Advanced Notification list. The Withdraw event will only appear on the Next Day list, however, if the issuer waits to

NFN Daily List

			the last minute to notify NFN Operations of the cancelled action.
Withdraw – Restore	A cancellation of a previously announced NFN instrument restore	Advanced Notification Next Day	Although Nasdaq would rarely, if ever, use this event code, it could theoretically need to withdraw a NFN instrument restore action. If it were to need to cancel the action, the Withdraw event would appear on both the Advanced Notification and Next Day lists.

Daily List Processing Summary

The following table summarizes each data field will be populated by Event Code.

NFN Daily List Posting Time

The NFN Daily List posting is a manual process performed by the NFN Operations department. NFN Operations will make every attempt to post the NFN Daily List files by 12 noon, ET. On occasion, NFN Operations may modify a record after the initial NFN Daily List files are posted. Nasdaq, therefore, recommends that firms check the NFN website for NFN Daily List file updates up until 6:00 p.m., Eastern Time.

NFN Directory

Web Service Parameters

To retrieve the NFN Directory, Web Service Users shall need to enter a call with the following parameters:

- **Documentation File Name:** User should enter **InstrumentDirectory**.
- **Date of Directory:** Data should be entered in MM-DD-YYYY or MM/DD/YYYY format. This is an optional operator.
- **File Type:** Data should indicate requested file format. Options: “XML” for XML formatted text, “pipe” for pipe (|) delimited text, “CSV” for CSV formatted text, or “JSON” for JSON format.

<https://nfn.nasdaq.com/servicecall/InstrumentDirectory.ashx?Date=MM-DD-YYYY&Type=pipe>

Directory File Format

Nasdaq will update its NFN Directory file to reflect of the active instruments at the start of each business day. Within the file, Nasdaq will include a header row with the field names. Within the file, the individual security records will appear as outlined below in alphabetic order based on the NFN Symbol field. As the last record in the file, Nasdaq will denote the Web Service request date (MM/DD/YYYY) and Web Service request time (HHMMSS).

Security Level Details

Data Field	Field Format	Description																										
Symbol	11 bytes, alphanumeric	Denotes the current Nasdaq-assigned identifier for NFN instrument.																										
Instrument Name	Text up to 150 bytes	Denotes the name of the NFN instrument as it appears on the prospectus document. Abbreviations may be used for NFN issue names over 150 bytes.																										
Issuer Name	Text up to 75 bytes	Denotes the firm name for the issuer of the NFN instrument.																										
Instrument Type / Tier	2 bytes, alphanumeric	Denotes the NFN security class and listing tier for the instrument. Exchange Code for Listed Instruments	4 bytes, alphanumeric	Denotes the ISO 10383 Market Identification Codes (MICs) for the primary listing market center for a NFN instrument, if applicable.														

NFN Daily List

Data Field	Field Format	Description								
		(Note: In the U.S., this field is typically populated only for closed-end funds / exchange traded funds or structured products.)								
Exchange Symbol For Listed Instruments	11 bytes, alphanumeric	Denotes the ticker identifier assigned by the primary listing market for the NFN instrument, if applicable.								
Newspaper Category	20 bytes, alphanumeric	Denotes the fund family heading to be used for the NFN instrument in U.S. newspaper price tables. (Note: This field is only populated for the two news media list fund types – MF and \$\$.)								
Newspaper Abbreviation	16 bytes, alphanumeric	Denotes the identifier to be used for the NFN instrument in U.S. newspaper price tables. (Note: This field is only populated for the two news media list fund types – MF and \$\$.)								
Deposit Date	10 byte, numeric	Denotes the date on which the NFN instrument is scheduled to deposit. Please note that this field is typically populated for UITs and structured products. Date field is stored in MM/DD/YYYY.								
Termination Date	10 byte, numeric	Denotes the date on which the NFN instrument is scheduled to mature or terminate. Please note that this field is typically populated for UITs and structured products. Date field is stored in MM/DD/YYYY.								
Par Value Per Unit / Share	12 bytes, alphanumeric	Denotes the par value per share or per unit for a NFN instrument. Please note that this field is typically only populated for debt-based instruments. If provided, the value will be stated in \$\$\$\$\$.dddddd format. If unavailable, this field will be space filled.								
NSCC Clearing Eligible	1 byte, alphanumeric	Denotes if the NFN instrument is National Securities Clearing Corporation (NSCC) eligible. The allowable values are: <table border="1" data-bbox="792 1346 1398 1644"> <thead> <tr> <th>Code</th> <th>Value</th> </tr> </thead> <tbody> <tr> <td>Y</td> <td>Yes. Y	Yes. NFN issuer has indicated that this instrument is GIPS Compliant.									
N	No. NFN issuer has indicated that this instrument is not GIPS Compliant.									
<space>	Not available. NFN Issuer did not provide GIPS compliance status.									
Insured	20 bytes, alphanumeric	Denotes whether the instrument is insured by FDIC or others, for Demand Deposit Accounts only. <table border="1" data-bbox="922 1272 1268 1402"> <thead> <tr> <th>Value</th> </tr> </thead> <tbody> <tr> <td>FDIC</td> </tr> <tr> <td>Other</td> </tr> <tr> <td>Not Applicable</td> </tr> </tbody> </table>	Value	FDIC	Other	Not Applicable				
Value										
FDIC										
Other										
Not Applicable										
Insured Amount	9 bytes, numeric	Indicates the amount of investment in Demand Deposit Account that is being insured. Data Format: \$\$\$\$\$\$.								
Model Portfolio	1 bytes, Alpha	Denotes that the instrument is a Model Portfolio. Allowable values are: <table border="1" data-bbox="776 1612 1203 1808"> <thead> <tr> <th>Code</th> <th>Value</th> </tr> </thead> <tbody> <tr> <td>Y</td> <td>Yes. The instrument is a Model Portfolio.</td> </tr> <tr> <td>N</td> <td>No. The instrument is not a Model Portfolio.</td> </tr> </tbody> </table> <p>Please note that Nasdaq will populate this field as "N" if not provided by the Issuer.</p>	Code	Value	Y	Yes. The instrument is a Model Portfolio.	N	No. The instrument is not a Model Portfolio.		
Code	Value									
Y	Yes. The instrument is a Model Portfolio.									
N	No. The instrument is not a Model Portfolio.									

Documentation Posting Service

Web Service Parameters

To retrieve the Documentation Posting Daily List file, Web Service Users shall need to enter a call with the following parameters:

- **Documentation File Name:** User should enter **DocPost.**
- **Date of Documentation File:** Data should be entered in MM-DD-YYYY or MM/DD/YYYY format.
- **File Type:** Data should indicate requested file format. Options: “XML” for XML formatted text, “pipe” for pipe (|) delimited text, “CSV” for CSV formatted text, or “JSON” for JSON format.

<https://nfn.nasdaq.com/servicecall/DocPost.ashx?Date=MM-DD-YYYY&Type=pipe>

Documentation Posting Service File Format

With the implementation of the NFN Daily List, Nasdaq allows Issuers / Pricing Agents to post certain financial documentation for NFN Instruments for the market data vendors to access. To facilitate the retrieval process, Nasdaq will create a daily file that lists the financial documentation with the current day’s posting date.

Security Level Details

Data Field	Field Format	Description
Posting Date	Date, MM/DD/YYYY	Denotes the date on which the NFN Documentation List file was generated. Date field is stored in MM/DD/YYYY format.
Posting Time	Time, HHMMSS	Denotes the time that the NFN Documentation List file was generated. The time will be stated in HHMMSS format. The time is based on US Eastern Time.
Symbol	11 bytes, alphanumeric	Denotes the Nasdaq-assigned identifier for NFN instrument at the time of the NFN Documentation List file posting. If there is an associated registration action, the Symbol will follow the following rules: <ul style="list-style-type: none"> • For instrument addition actions, the field will match the Symbol – New value from the Daily List – Next Day file. • For replacement actions, the field will reflect the Symbol - New value from the Daily List – Next Day file. • For instrument attribute change actions, the field will reflect the Symbol – Current value from the Daily List – Next Day file. • For deletion actions, the field will reflect the Symbol – Current value from the Daily List – Next Day file.
Instrument Name	Text up to 150 bytes	Denotes the Instrument (Issue) Name in the NFN system at the time of the NFN Documentation List file posting.
CUSIP	9 bytes, alphanumeric	Denotes the CUSIP number in the NFN system at the time of the NFN Documentation List file posting. Please note that

NFN Daily List

Data Field	Field Format	Description																														
		Nasdaq will only populate this field for recipient firms with a valid CUSIP license and entitlement token.																														
Country of Issuance	2 bytes, alphanumeric	Denotes listed as the primary registration location for the issuance. For this field, Nasdaq will use ISO 3166 country codes .																														
ISIN	12 bytes, alphanumeric	Denotes the International Security Identification Number (ISIN) for the NFN Instrument at the time of the NFN Documentation List file posting. The ISIN should map to the country of issuance. (Note: This field is optional for NFN instruments based in the United States.)																														
Instrument Type / Tier	2 bytes, alphanumeric	Denotes the NFN security class and listing tier for the instrument on the stated System effective date. Allowable values are: <table border="1" data-bbox="764 747 1370 1350"> <thead> <tr> <th>Code</th> <th>Value</th> </tr> </thead> <tbody> <tr> <td>MF</td> <td>Mutual Fund – News Media List</td> </tr> <tr> <td>MS</td> <td>Mutual Fund – Supplemental List</td> </tr> <tr> <td>\$\$</td> <td>Money Market Fund – News Media List</td> </tr> <tr> <td>\$\$</td> <td>Money Market Fund – Supplemental List</td> </tr> <tr> <td>US</td> <td>Unit Investment Trust (UIT)</td> </tr> <tr> <td>AN</td> <td>Annuity</td> </tr> <tr> <td>SP</td> <td>Structured Product</td> </tr> <tr> <td>AP</td> <td>Alternative Investment Product (AIP)</td> </tr> <tr> <td>EM</td> <td>NextShares Exchange Traded Managed Fund</td> </tr> <tr> <td>MA</td> <td>Managed Accounts</td> </tr> <tr> <td>CT</td> <td>Collective Investment Trust</td> </tr> <tr> <td>SA</td> <td>Separate Accounts</td> </tr> <tr> <td>HF</td> <td>Hedge Fund</td> </tr> <tr> <td>DD</td> <td>Demand Deposit Account</td> </tr> </tbody> </table>	Code	Value	MF	Mutual Fund – News Media List	MS	Mutual Fund – Supplemental List	\$\$	Money Market Fund – News Media List	\$\$	Money Market Fund – Supplemental List	US	Unit Investment Trust (UIT)	AN	Annuity	SP	Structured Product	AP	Alternative Investment Product (AIP)	EM	NextShares Exchange Traded Managed Fund	MA	Managed Accounts	CT	Collective Investment Trust	SA	Separate Accounts	HF	Hedge Fund	DD	Demand Deposit Account

Documentation URL	URL Address	NFN file name / file path from which the actual document can be accessed and downloaded.							
Test Symbol Flag	1 byte, alphanumeric	<p>Denotes if the instrument is set up as a live or test issue currently in the NFN system. The allowable values are:</p> <table border="1"> <thead> <tr> <th>Code</th> <th>Value</th> </tr> </thead> <tbody> <tr> <td>Y</td> <td>NFN Test Symbol. Instrument is intended for test use only.</td> </tr> <tr> <td>N</td> <td>NFN Live Symbol. Instrument is set up as live / production in NFN system.</td> </tr> </tbody> </table>	Code	Value	Y	NFN Test Symbol. Instrument is intended for test use only.	N	NFN Live Symbol. Instrument is set up as live / production in NFN system.	
Code	Value								
Y	NFN Test Symbol. Instrument is intended for test use only.								
N	NFN Live Symbol. Instrument is set up as live / production in NFN system.								
Issuer Name	75 bytes, alphanumeric	Denotes the name of the Issuer / Sponsor for the NFN instrument at the time of the NFN Document Posting Service file posting.							
Creation Date	Date, MM/DD/YYYY	Denotes the date the document was created in the NFN system. Date field is stored in MM/DD/YYYY format.							

Once the Documentation List is downloaded, the user may automate access to the individual PDF documents by generating a Web Service request for each of the NFN Documentation File Names provided in the file.

NFN Root Directory

Web Service Parameters

To retrieve the NFN Root Directory, Web Service Users shall need to enter a call with the following parameters:

- Issuer CUSIP: First 6 of the CUSIP assigned to the issuer by CUSIP and registered with Nasdaq Fund Network Operations.
- Root Symbol: 13 character Root Symbol assigned by Nasdaq Fund Network Operations. This is an optional operator.
- Data Type: Data should indicate requested file format. Options: “XML” for XML formatted text, “pipe” for pipe (|) delimited text, “CSV” for CSV formatted text, or “JSON” for JSON format.

[https://nfn.nasdaq.com/servicecall/RootDirectory.ashx?issuercusip=\[issuercusip\]&ROOTSYMBOL=\[rootsymbol\]&Type=pipe](https://nfn.nasdaq.com/servicecall/RootDirectory.ashx?issuercusip=[issuercusip]&ROOTSYMBOL=[rootsymbol]&Type=pipe)

Root Directory File Format

Nasdaq will update its NFN Root Directory file to reflect of the active roots. Within the file, Nasdaq will include a header row with the field names. Within the file, the individual security records will appear as outlined below in alphabetic order based on the Symbol field.

Security Level Details

Data Field	Field Format	Description													
Issuer Name	Text up to 75 bytes	Denotes the name of the Issuer / Sponsor for the NFN Root.

Investor Suitability	100 bytes, alphanumeric	Denotes the investor suitability for the fund.					

Root Directory Dynamic File Format

Within the Root Directory file are dynamic tables that provide information for the multi select options in the Root directory. These files follow the above options with headers.

- The headers for the Root Directory files are 5 "=", followed by the Category Name, padded with "=" to 100 characters.

Asset Category

Denotes the broad focus and objective of this asset's exposure.

For a current list of options can be found in the [NFN Application](#).

Data Field	Field Format	Description
Header	100 characters	5 "=", "Asset Category", Padded "=" to 100
Asset Category	40 bytes, alphanumeric	Denotes the options for this field. Options in this field are subject to change as requested by issuers. A current list of options can be found in the NFN Application .
Root Symbol	13 bytes, alphanumeric	Denotes the Root Symbol assigned by Nasdaq.

Portfolio Top Holdings

Denotes the broad focus and objective of this asset's exposure. NFN Portfolio Top Holdings download will be limited to the top 20 holdings. For full holdings report, you can send a request to NFNops@nasdaq.com.

Data Field	Field Format	Description																																										
Header	100 characters	5 "=", "Portfolio Top Holdings", "=" to 100																																										
Root Symbol	13 bytes, alphanumeric	Denotes the Root Symbol assigned by Nasdaq.																																										
CUSIP	9 bytes, alphanumeric	Denotes the CUSIP number for the security. *Note: Nasdaq will only populate this field for recipient firms with a valid CUSIP license and entitlement token.																																										
ISIN	12 bytes, alphanumeric	Denotes the ISIN for the security.																																										
Security Ticker	30 bytes, alphanumeric	Denotes the market ticker for the security.																																										
Percent	28 bytes, alphanumeric	Expressed as a percentage. Percentage value compared to net assets of the Fund. XXX.xxxxxxxxxxxxxxxxxxxxxxxxxxxx																																										
Update Date	Date, MMDDYYYY	Reporting period, date as of which information is reported.																																										
Security Name	Text up to 150 characters	Denotes the Issue Name for the security.																																										
Asset Category	10 bytes, alphanumeric	Denotes the type of assets that are categorized by similar characteristics. <table border="1" data-bbox="781 999 1414 1801"> <thead> <tr> <th>VALUE</th> <th>CODE DESCRIPTION</th> </tr> </thead> <tbody> <tr><td>STIV</td><td>Short-term investment vehicle</td></tr> <tr><td>RA</td><td>Repurchase agreement</td></tr> <tr><td>EC</td><td>Equity-common</td></tr> <tr><td>EP</td><td>Equity-preferred</td></tr> <tr><td>DBT</td><td>Debt</td></tr> <tr><td>DCO</td><td>Derivative-commodity</td></tr> <tr><td>DCR</td><td>Derivative-credit</td></tr> <tr><td>DE</td><td>Derivative-equity</td></tr> <tr><td>DFE</td><td>Derivative-foreign exchange</td></tr> <tr><td>DIR</td><td>Derivative-interest rate</td></tr> <tr><td>DO</td><td>Derivatives-other</td></tr> <tr><td>SN</td><td>Structured note</td></tr> <tr><td>LON</td><td>Loan</td></tr> <tr><td>ABS-MBS</td><td>ABS-mortgage backed security</td></tr> <tr><td>ABS-APCP</td><td>ABS-asset backed commercial paper</td></tr> <tr><td>ABS-CBDO</td><td>ABS-collateralized bond/debt obligation</td></tr> <tr><td>ABS-O</td><td>ABS-other</td></tr> <tr><td>COMM</td><td>Commodity</td></tr> <tr><td>RE</td><td>Real estate</td></tr> <tr><td>OTHER</td><td>A brief description is provided.</td></tr> </tbody> </table>	VALUE	CODE DESCRIPTION	STIV	Short-term investment vehicle	RA	Repurchase agreement	EC	Equity-common	EP	Equity-preferred	DBT	Debt	DCO	Derivative-commodity	DCR	Derivative-credit	DE	Derivative-equity	DFE	Derivative-foreign exchange	DIR	Derivative-interest rate	DO	Derivatives-other	SN	Structured note	LON	Loan	ABS-MBS	ABS-mortgage backed security	ABS-APCP	ABS-asset backed commercial paper	ABS-CBDO	ABS-collateralized bond/debt obligation	ABS-O	ABS-other	COMM	Commodity	RE	Real estate	OTHER	A brief description is provided.

Allocation	XXX.XXX	Expressed as a percentage, total of all Portfolio Stratification options. Percentages will not exceed 100%.						
Update Date	Date, MMDDYY	Indicates the date the Portfolio Stratification percentages were submitted to NFN.						

Country of Sale

Denotes the Country in which the UCITS is available for sale.

Data Field	Field Format	Description
Header	100 characters	5 "=", "ISO Region/State", "=" to 100
Root Symbol	13 bytes, alphanumeric	Denotes the Root Symbol assigned by Nasdaq.
Region State Code	2 bytes, alphanumeric	Denotes the two character U.S. state abbreviation listed as the primary registration location for the issuance.
Region State	20 Bytes, alphanumeric	Denotes the name of the state of the primary registration location for the issuance.
Country Code	3 bytes, alphanumeric	Denotes the three character country code listed as the primary registration location for the issuance. A list of options can be found in the NFN Application .
Country	100 bytes, alphanumeric	Denotes the name of the country of the primary registration location for the issuance.

Region Weight

The assets percent of total exposure to each specific regional location.

Data Field	Field Format	Description
Header	100 characters	5 "=", "Region Weight", "=" to 100
Root Symbol	13 bytes, alphanumeric	Denotes the Root Symbol assigned by Nasdaq.
Region	50 bytes, alphanumeric	Denotes the region name. A list of options can be found in the NFN Application .
Region Weight	XXX.XXX	Denotes the percentage of exposure to the specific region, expressed as a percentage. Percentage will not exceed 100%.

Management

The team of professional in charge of this investment discipline.

Data Field	Field Format	Description
Header	100 characters	5 "=", "Management", "=" to 100
Root Symbol	13 bytes, alphanumeric	Denotes the Root Symbol assigned by Nasdaq.
Fund Manager	30 bytes, alphanumeric	Denotes the Name of the professional in charge of the investment discipline
Management Tenure	Up to 2147483647	Denotes the number of years management has serviced this fund.
Fund Manager Date	Date, MMDDYYYY	Denoted the date that the fund manager began managing the fund.

Issuer Directory

Web Service Parameters

To retrieve the Issuer Directory, Web Service Users shall need to enter a call with the following parameters:

- **Issuer Directory File Name:** User should enter **Issuer**.
- **File Type:** Data should indicate requested file format. Options: "XML" for XML formatted text, "pipe" for pipe (|) delimited text, "CSV" for CSV formatted text, or "JSON" for JSON format.

<https://nfn.nasdaq.com/servicecall/IssuerDirectory.ashx?type=PIPE>

Issuer Directory File Format

Nasdaq will update its Issuer Directory file to reflect of the active Issuer. Within the file, Nasdaq will include a header row with the field names. Within the file, the individual records will appear as outlined below in alphabetic order based on the Issuer Name field.

Security Level Details

Data Field	Field Format	Description
Issuer Name	11 bytes, alphanumeric	Denotes the name of the Issuer / Sponsor as registered with NFN.
Description	1000 bytes, alphanumeric	Denotes the description of the Issuer.
Website	Up to 2048 bytes, alphanumeric	Denotes the URL for the Issuer's public website.
Headquarters Location	300 bytes, alphanumeric	Denotes the physical address of the Issuer headquarter location.
Total Assets Under Management	10 bytes, numeric	Denotes the Total Assets Under Management for the Issuer.
Total Assets Under Management Date	Date, MM/DD/YYYY	Denotes the Date of Total Assets Under Management for the Issuer.
In Business Since	4 bytes, numeric	Denotes the year that the Issuer began operation.

Data Field	Field Format	Description
Investor Relations Phone	20 bytes, numeric	Denotes the phone number for Investor Relations.
Investor Relations Email	400 bytes, alphanumeric	Denotes the email address for Investor Relations.
Live Instruments Count	11 bytes, alphanumeric	Denotes the number of Live instruments listed with NFN under the issuer.
Investor Invested Assets	11 bytes, numeric	Denotes the amount of investor assets invested.

Valuation Report Web Service Calls

Web Service Parameters

To retrieve the Valuation Reports, Web Service Users shall need to enter a call with the following parameters:

- **Valuation Report File Name:** User should enter **ValuationReportFund**, or **ValuationReportMoneyMarket**.
- **File Type:** Data should indicate requested file format. Options: “XML” for XML formatted text, “pipe” for pipe (|) delimited text, “CSV” for CSV formatted text, or “JSON” for JSON format.

<https://nfn.nasdaq.com/servicecall/valuation.ashx?reportname=ValuationReportFund&Type=pipe>

<https://nfn.nasdaq.com/servicecall/valuation.ashx?reportname=ValuationReportMoneyMarket&Type=pipe>

<https://nfn.nasdaq.com/servicecall/CurrentActivity.ashx?testflag=true/false&Type=PIPE>

Ex Date Report

Web Service Parameters

To retrieve the Ex-Date Report, Web Service Users shall need to enter a call with the following parameters:

NFN Daily List

- **Ex-Date File Name:** User should enter **ExDate**.
- **Date for Ex-Date File:** User should enter the ex-date filter to be applied to the report. Data should be entered in **MM-DD-YYYY** or **MM/DD/YYYY** format. Please note the following report date limitations:
 - The Ex-Date Report will only return Dividend/Interest or Capital Distribution records entered into the NFN system on or after February 2017.
- **File Type:** Data should indicate requested file format. Options: “XML” for XML formatted text, “pipe” for pipe (|) delimited text, “CSV” for CSV formatted text, or “JSON” for JSON format.

<https://nfn.nasdaq.com/servicecall/exdate.ashx?type=CSV&date=MM/DD/YYYY>

Ex-Date Report File Format

Nasdaq allows NFN pricing agents to enter advance notifications of Dividend/Interest and Capital Distribution actions. To ensure that the market data community has access to these corporate actions on the appropriate ex-date, Nasdaq is adding the Ex-Date Report to the NFN Daily List product.

Security Level Details

Data Field	Field Format	Description																														
Symbol	11 bytes, alphanumeric	Denotes the Nasdaq-assigned identifier for NFN instrument reflected in the Dividend/Interest or Capital Distribution record.																														
CUSIP	9 bytes, alphanumeric	Denotes the CUSIP number for the NFN instrument in the NFN system at the time that the Ex-Date Report was generated. Please note that Nasdaq will only populate this field for recipient firms with a valid CUSIP license and entitlement token.																														
Instrument Type / Tier	2 bytes, alphanumeric	Denotes the NFN Fund Type and Listing Tier for the NFN instrument in the NFN system at the time that the Ex-Date Report was generated. C	Corrected corporate action record									
X	Cancelled corporate action record									
Ex Date	Date, MM/DD/YYYY	<p>Denotes the Ex-Date reported for the Dividend/Interest or Capital Distribution message.</p> <p>(Note: The report content is based on the user provided value for this field.)</p>								
Payment Date	Date, MM/DD/YYYY -or- NA	<p>Denotes the date on which dividends, interest payments or distributions is expected to be distributed to the NFN instrument's shareholders of record.</p> <p>If a payment date is reported, this field format will be MM/DD/YYYY.</p> <p>If no payment date is entered, this field will be populated as "NA".</p>								
Record Date	Date, MM/DD/YYYY -or- NA	<p>Denotes the date on which shareholders must hold fund shares to receive dividend, interest or distributions.</p> <p>If a record date is reported, this field format will be MM/DD/YYYY.</p> <p>If no record date is entered, this field will be populated as "NA".</p>								
Reinvest Date	Date, MM/DD/YYYY -or- NA	<p>Denotes the reinvestment date for the dividend or distribution (if applicable).</p> <p>If a reinvestment date is reported, this field format will be MM/DD/YYYY.</p> <p>If no reinvestment date is entered, this field will be populated as "NA".</p>								
Entry Date	Date, MM/DD/YYYY	Denotes the NFN system date associated with the distribution record event.								

NFN Daily List

Data Field	Field Format	Description										
		<p>If UpdateType = New, the Entry Date field will reflect the date that the record was initially entered into the NFN system.</p> <p>If UpdateType = Corrected or Cancelled, the Entry Date field will reflect the date that the record was last updated in the NFN system.</p>										
Currency	Alphanumeric	Denotes the currency in which the NFN instrument will submit valuation data as of System Effective Date. Nasdaq will use the GitHub currency alphabetic codes for this field. The default value is "USD".										
Cash Distribution Type	Alphanumeric	<p>This field indicates the type of cash distribution being reported in the following cash distribution fields. Allowable values will be:</p> <table border="1" data-bbox="764 716 1414 1094"> <thead> <tr> <th data-bbox="764 716 906 751">Code</th> <th data-bbox="906 716 1414 751">Definition</th> </tr> </thead> <tbody> <tr> <td data-bbox="764 751 906 787">Dividend</td> <td data-bbox="906 751 1414 787">Cash Dividend</td> </tr> <tr> <td data-bbox="764 787 906 823">Interest</td> <td data-bbox="906 787 1414 823">Interest Income</td> </tr> <tr> <td data-bbox="764 823 906 858">Special</td> <td data-bbox="906 823 1414 858">Special Cash Dividend</td> </tr> <tr> <td data-bbox="764 858 906 1094">NA</td> <td data-bbox="906 858 1414 1094"> <p>Not applicable, no cash distribution being reported.</p> <p>Please note that Nasdaq will populate this field as "NA" in the event of a stock only dividend or capital distribution.</p> </td> </tr> </tbody> </table>	Code	Definition	Dividend	Cash Dividend	Interest	Interest Income	Special	Special Cash Dividend	NA	<p>Not applicable, no cash distribution being reported.</p> <p>Please note that Nasdaq will populate this field as "NA" in the event of a stock only dividend or capital distribution.</p>
Code	Definition											
Dividend	Cash Dividend											
Interest	Interest Income											
Special	Special Cash Dividend											
NA	<p>Not applicable, no cash distribution being reported.</p> <p>Please note that Nasdaq will populate this field as "NA" in the event of a stock only dividend or capital distribution.</p>											
Total Cash Distribution	13 bytes, alphanumeric	<p>Denotes the total cash dividend or total interest distribution being reported for the NFN instrument. Firms may report the breakdown of cash dividends / interest distribution in the fields that follow.</p> <p>At the time of data entry, Total Cash Distribution is reported as \$\$\$\$\$.dddddd.</p> <p>Please note that Nasdaq will populate this field as "NA" in the event of a stock only dividend or capital distribution.</p>										
Non-Qualified Cash Distribution	13 bytes, alphanumeric	<p>Denotes the portion of the cash dividend or interest income that is taxed as ordinary income to the shareholder. Please note that this value should be entered as a dollar amount (not a percentage).</p> <p>At the time of data entry, non-qualified cash distribution is entered as \$\$\$\$\$.dddddd.</p> <p>If non-qualified cash distribution is not entered, the field will be populated as "NA".</p>										
Qualified Cash Distribution	13 bytes, alphanumeric	Denotes the portion of the cash dividend or interest that is taxed as a qualified dividend to shareholder. Please note that this value should be entered as a dollar amount (not a percentage).										

Data Field	Field Format	Description
		<p>At the time of data entry, qualified cash distribution is entered as \$\$\$\$\$\$.dddddd.</p> <p>If qualified cash distribution is not entered, the field will be populated as "NA".</p>
Tax-Free Cash Distribution	13 bytes, alphanumeric	<p>Denotes the portion of the cash dividend or interest attributable to bonds that is not taxed to the shareholder. Please note that this value should be entered as a dollar amount (not a percentage).</p> <p>At the time of data entry, tax free cash distribution is entered as \$\$\$\$\$\$.dddddd.</p> <p>If tax free cash distribution is not entered, the field will be populated as "NA".</p>
Ordinary Foreign Tax Credit	13 bytes, alphanumeric	<p>Denotes the portion of the cash dividend or interest from a foreign corporation that is not "qualified" by the IRS. Please note that this value should be entered as a dollar amount (not a percentage).</p> <p>At the time of data entry, ordinary foreign tax credit is entered as \$\$\$\$\$\$.dddddd.</p> <p>If ordinary foreign tax credit is not entered, the field will be populated as "NA".</p>
Qualified Foreign Tax Credit	13 bytes, alphanumeric	<p>Denotes the portion of the cash dividend or interest attributable to qualified foreign corporation as defined by the IRS. Please note that this value should be entered as a dollar amount (not a percentage).</p> <p>At the time of data entry, qualified foreign tax credit is entered as \$\$\$\$\$\$.dddddd.</p> <p>If qualified foreign tax credit is not entered, the field will be populated as "NA".</p>
Stock Dividend Ratio	11 bytes, alphanumeric	<p>Denotes the stock split/dividend ratio for a NFN instrument. The field format is as follows:</p> <ul style="list-style-type: none"> • If a stock split/dividend is entered, the amount will be stated in the following numeric format: \$\$\$\$.dddddd. • Examples: <ul style="list-style-type: none"> ○ 2-for-1 stock split should be reported as "0002.000000". ○ 1-for-2 reverse stock split should be reported as "0000.500000". ○ 10% stock dividend would be reported as "0001.100000". • If no stock split/dividend is entered, the field will be populated as "NA".

NFN Daily List

Data Field	Field Format	Description						
Short Term Capital Gain	13 bytes, alphanumeric	<p>Denotes the per share amount of short-term capital gains for a NFN instrument. A short-term capital gain is a profit resulting from the sale of securities held in the fund portfolio for less than one year.</p> <p>At the time of data entry, Short Term Gain is reported as \$\$\$\$\$.dddddd.</p> <p>Please note that Nasdaq will populate this field as "NA" if no short term gain is entered for stated ex-date.</p>						
Long Term Capital Gain	13 bytes, alphanumeric	<p>Denotes the total capital gain for the NFN instrument that is taxed to the shareholder at the long-term capital gains rate.</p> <p>At the time of data entry, Long Term Gain is reported as \$\$\$\$\$.dddddd.</p> <p>Please note that Nasdaq will populate this field as "NA" if no long term gain is entered for stated ex-date.</p>						
Unallocated Distributions	13 bytes, alphanumeric	<p>Denotes the amount of unassigned term gains being reported for the NFN instrument.</p> <p>At the time of data entry, Unallocated Distributions are reported as \$\$\$\$\$.dddddd.</p> <p>Please note that Nasdaq will populate this field as "NA" if no unallocated distribution value is entered for stated ex-date.</p>						
Return Of Capital	13 bytes, alphanumeric	<p>Denotes the amount of return of capital (ROC) to the NFN instrument's shareholders. Please note that this value should be entered as a dollar amount (not a percentage).</p> <p>At the time of data entry, Return of Capital is reported as \$\$\$\$\$.dddddd.</p> <p>Please note that Nasdaq will populate this field as "NA" if no return of capital is entered for stated ex-date.</p>						
Issuer Name	Text up to 150 bytes	Denotes the NFN issuer name associated with the NFN instrument at the time that the Ex-Date Report was generated.						
Pricing Agent	Text up to 150 bytes	Denotes the NFN pricing agent name associated with the NFN instrument at the time that the Ex-Date Report was generated.						
Status	Text up to 10 bytes	<p>Denotes the current instrument status in NFN system. Allowable values are:</p> <table border="1" data-bbox="846 1667 1336 1766"> <thead> <tr> <th>Value</th> <th>Definition</th> </tr> </thead> <tbody> <tr> <td>Live</td> <td>Live / production security</td> </tr> <tr> <td>Test</td> <td>Test security</td> </tr> </tbody> </table>	Value	Definition	Live	Live / production security	Test	Test security
Value	Definition							
Live	Live / production security							
Test	Test security							
ISIN	Text up to 12 bytes	Denotes the NFN issuer name associated with Denotes the ISIN for the NFN Instrument at the time of the Daily List posting. The ISIN should map to the country of issuance.						

NFN Daily List

Data Field	Field Format	Description						
Nasdaq Security Master	10 bytes, alphanumeric	Denotes the Nasdaq Security Master, as created by the NFN system, for the NFN instrument as of the System Effective Date.						
Model Portfolio	1 bytes, Alpha	<p>Denotes that the instrument is a Model Portfolio. Allowable fields are:</p> <table border="1" data-bbox="878 422 1304 621"> <thead> <tr> <th data-bbox="878 422 1040 453">Code</th> <th data-bbox="1040 422 1304 453">Value</th> </tr> </thead> <tbody> <tr> <td data-bbox="878 453 1040 520">Y</td> <td data-bbox="1040 453 1304 520">Yes. The instrument is a Model Portfolio.</td> </tr> <tr> <td data-bbox="878 520 1040 621">N</td> <td data-bbox="1040 520 1304 621">No. The instrument is not a Model Portfolio.</td> </tr> </tbody> </table> <p>Please note that Nasdaq will populate this field as “N” if not provided by the Issuer.</p>	Code	Value	Y	Yes. The instrument is a Model Portfolio.	N	No. The instrument is not a Model Portfolio.
Code	Value							
Y	Yes. The instrument is a Model Portfolio.							
N	No. The instrument is not a Model Portfolio.							

NFN Ex-Date Report Timing

The NFN Ex-Date Report is automatically updated during the NFN U.S. reporting session as NFN pricing agents enter dividend and capital distribution data into the system. For the most complete data set, Nasdaq recommends that firms pull the ex-date report between after the U.S. session close at 8:00 p.m., ET.

Appendix A –Documentation Version Control Log

Date	Version Information																																																
November 23, 2010 April 7, 2011	Initial release of MFQS Daily List / MFQS Registration Service specification. Updated “Architecture” section of document to address user security set for NFN Daily List.																																																
May 26, 2011	Updated the URL addresses for the NFN Daily List for the June 13, 2011 release.																																																
June 16, 2011	<p>Added Ex-Date Report file format to the NFN Daily List specification.</p> <p>Corrected event code language for an instrument modification from “Change Request” to “MFQS Attribute Change”.</p> <p>Updated NFN code sample to include a security certificate statement.</p> <p>Updated the URL Address statements to use https://www.nasdaqMFQS.com (rather than https://beta.nasdaqMFQS.com).</p>																																																
July 19, 2011	<p>Added Table of Contents and Hours of Operation section to document.</p> <p>Added section on the NFN Daily List transition with a hyperlink to the data comparison document that shows how fields map from the legacy NASDAQ Trader file to the new NFN Daily List file.</p>																																																
May 18, 2012	<p>Updated NFN Daily List file format to reflect new Event Action Codes to be release on or about June 24, 2012. As noted in the release notes section of the document, Nasdaq will be making the following changes to the Event Code values:</p>																																																
	<table border="1"> <thead> <tr> <th data-bbox="597 1087 862 1157">Event Code</th> <th data-bbox="862 1087 1127 1157">Supported in Initial Release</th> <th data-bbox="1127 1087 1408 1157">Supported in June 2012 Release</th> </tr> </thead> <tbody> <tr> <td data-bbox="597 1157 862 1190">Addition</td> <td data-bbox="862 1157 1127 1190">Yes</td> <td data-bbox="1127 1157 1408 1190">Yes</td> </tr> <tr> <td data-bbox="597 1190 862 1224">Anticipated Addition</td> <td data-bbox="862 1190 1127 1224">Yes, but not used</td> <td data-bbox="1127 1190 1408 1224">No</td> </tr> <tr> <td data-bbox="597 1224 862 1257">Deletion</td> <td data-bbox="862 1224 1127 1257">Yes</td> <td data-bbox="1127 1224 1408 1257">Yes</td> </tr> <tr> <td data-bbox="597 1257 862 1291">UIT Replacement</td> <td data-bbox="862 1257 1127 1291">Yes</td> <td data-bbox="1127 1257 1408 1291">Yes</td> </tr> <tr> <td data-bbox="597 1291 862 1325">MFQS Attribute Change</td> <td data-bbox="862 1291 1127 1325">Yes</td> <td data-bbox="1127 1291 1408 1325">Yes</td> </tr> <tr> <td data-bbox="597 1325 862 1358">Correction – Addition</td> <td data-bbox="862 1325 1127 1358">Yes</td> <td data-bbox="1127 1325 1408 1358">No</td> </tr> <tr> <td data-bbox="597 1358 862 1392">Correction – Deletion</td> <td data-bbox="862 1358 1127 1392">Yes</td> <td data-bbox="1127 1358 1408 1392">No</td> </tr> <tr> <td data-bbox="597 1392 862 1461">Correction – UIT Replacement</td> <td data-bbox="862 1392 1127 1461">Yes, but not used</td> <td data-bbox="1127 1392 1408 1461">No</td> </tr> <tr> <td data-bbox="597 1461 862 1530">Correction – NFN Attribute Change</td> <td data-bbox="862 1461 1127 1530">Yes</td> <td data-bbox="1127 1461 1408 1530">No</td> </tr> <tr> <td data-bbox="597 1530 862 1564">Restore</td> <td data-bbox="862 1530 1127 1564">No</td> <td data-bbox="1127 1530 1408 1564">Yes</td> </tr> <tr> <td data-bbox="597 1564 862 1598">Withdraw – Addition</td> <td data-bbox="862 1564 1127 1598">No</td> <td data-bbox="1127 1564 1408 1598">Yes</td> </tr> <tr> <td data-bbox="597 1598 862 1631">Withdraw – Deletion</td> <td data-bbox="862 1598 1127 1631">No</td> <td data-bbox="1127 1598 1408 1631">Yes</td> </tr> <tr> <td data-bbox="597 1631 862 1701">Withdraw – UIT Replacement</td> <td data-bbox="862 1631 1127 1701">No</td> <td data-bbox="1127 1631 1408 1701">Yes</td> </tr> <tr> <td data-bbox="597 1701 862 1770">Withdraw – NFN Attribute Change</td> <td data-bbox="862 1701 1127 1770">No</td> <td data-bbox="1127 1701 1408 1770">Yes</td> </tr> <tr> <td data-bbox="597 1770 862 1803">Withdraw – Restore</td> <td data-bbox="862 1770 1127 1803">No</td> <td data-bbox="1127 1770 1408 1803">Yes</td> </tr> </tbody> </table>	Event Code	Supported in Initial Release	Supported in June 2012 Release	Addition	Yes	Yes	Anticipated Addition	Yes, but not used	No	Deletion	Yes	Yes	UIT Replacement	Yes	Yes	MFQS Attribute Change	Yes	Yes	Correction – Addition	Yes	No	Correction – Deletion	Yes	No	Correction – UIT Replacement	Yes, but not used	No	Correction – NFN Attribute Change	Yes	No	Restore	No	Yes	Withdraw – Addition	No	Yes	Withdraw – Deletion	No	Yes	Withdraw – UIT Replacement	No	Yes	Withdraw – NFN Attribute Change	No	Yes	Withdraw – Restore	No	Yes

June 13, 2012	<p>For the NFN Daily List file formats, Nasdaq updated the Documentation Available field description to make it clear that while the flag may appear on Advanced and Next Day file versions, the NFN system will not actually post the supporting document until the stated effective date.</p>																																																

NFN Daily List

Within the Documentation List file format, Nasdaq added a value to the Documentation Type field list of “P-DRFT” for a draft prospectus.

In addition, Nasdaq added a new file format option of “ExcelXML” for a formatted MS-Excel file to the document.

February 11, 2013

For the March 11, 2013 release, Nasdaq added new Issue Type and Issue Category field values for the new Alternative Investment Product (AIP) asset class to NFN Daily List, NFN Directory and other file formats.

At the request of the market data community, Nasdaq also new NSCC related fields to the NFN Daily List and NFN Directory files formats. In addition, Nasdaq also added a new NFN System Start Date field to the NFN Directory file format.

Please note that the new values and fields are denoted in red typeface within this document.

April 15, 2013

For the NFN Documentation Post file, Nasdaq updated the allowable DocumentationType and AssociatedAction values for website consistency reasons. Nasdaq also updated the field names to match the actual file headers.

July 5, 2013

Nasdaq updated the following field values to reflect NFN system changes to be implemented on or about September 9, 2013:

File Name	Field Names	Update
NFN Daily List – All Versions	MFQS Event Code	Changed value from “UIT Replacements” to “Replacements” as Nasdaq will support the replacement application option for Structured Product instruments as well as Unit Investment Trusts.
NFN Daily List – All Versions	NFN Issue Category – Current, NFN Issue Category – New	Updated Issue Category values for Structured Products instruments to reflect new industry recommendations.
NFN Daily List – All Versions	CUSIP – Current, CUSIP – New	Added note to reflect that CUSIP field will only be populated if the NFN Daily List recipient firm has a valid CUSIP license and entitlement token.
NFN Daily List – All Versions	Deletion Reason	Added “P” value for postponed issuances. Value will be used if the NFN issuer advises Nasdaq of the postponement after the System effective date.

NFN Daily List

NFN Daily List – All Versions	CUSIP for Merger	Added note to reflect that CUSIP field will only be populated if the NFN Daily List recipient firm has a valid CUSIP license and entitlement token.
NFN Directory	NFN Issue Code	Updated NFN Issue Code values for Structured Products instruments to reflect new industry recommendations.
NFN Directory	CUSIP	Added note to reflect that CUSIP field will only be populated if the NFN Daily List recipient firm has a valid CUSIP license and entitlement token.
NFN Document Posting Service	CUSIP	Added note to reflect that CUSIP field will only be populated if the NFN Daily List recipient firm has a valid CUSIP license and entitlement token.
NFN Document Posting Service	AssociatedAction	Changed value from “UIT Replacement” to “Replacement”.
Ex Date Report	DistributionType	Added value of “Special” for special cash distributions reported by the NFN pricing agent for the instrument.
Ex Date Report	FundCode	Updated FundCode values for Structured Products instruments to reflect new industry recommendations.
Ex Date Report	CUSIP	Added note to reflect that CUSIP field will only be populated if the NFN Daily List recipient firm has a valid CUSIP license and entitlement token.

May 1, 2014

Updated file formats for NFN Daily List, NFN Symbol Directory and NFN Ex-Date Report files to support test symbols. Also standardized NFN field names across products and modify file formats to better reflect instrument data from NFN issuers.

NFN Daily List file format changes:

- Add fields for Test Symbol Flag, Symbol Reuse Flag, Instrument Registration and Total Net Assets – Inception Date.

NFN Daily List

- Delete Fields for Fund Manager Last Name – Current, Fund Manager First Name – Current, Fund Manager Last Name – New, Fund Manager First Name – New, Fund Manager Start Date.
- Standardize field names.
- Standardize mutual fund codes for Instrument Code field. For Open-end mutual funds, the Instrument Code will change from “Z” to “O”. For Closed-end mutual funds, the Instrument Code will change from “Y” to “C”.

NFN Documentation Post List file format changes:

- Add field for Test Symbol Flag.
- Standardize field names.

NFN Directory file format changes:

- Add new fields for Test Symbol Flag, Instrument Registration, and Total Net Assets – Inception Date.
- Support fields for Distribution Type and Distribution Frequency.
- Delete fields for Fund Manager Last Name and Fund Manager First Name.
- Standardized field names.
- Standardized mutual fund codes for Instrument Code field as noted above.

Ex Date file format changes:

- Add field for Status
- Standardize field names
- Standardize codes for Instrument Type / Tier, Instrument Code, Distribution Message, and Action fields to match NFN Daily List / NFN Directory files.

March 6, 2015 Nasdaq added Instrument Type and Instrument Code values for a new asset class, Exchange Traded Managed Fund (ETMF), to be supported in late 2015.

May 15, 2015 Nasdaq updated its NFN symbology for ETMFs to be 7-characters with no delimiters. The NFN symbol will consist of Nasdaq’s 5-character trading symbol and the ending characters “NX”.

January 20, 2016 Nasdaq updated NextShares Exchange Traded Managed Fund references to reflect product naming changes.

For NFN Daily List, Nasdaq added two Deletion Reason codes for Instrument Conversions (V) and Instrument Reorganizations (R).

For NFN Documentation List, Nasdaq also added a Document Type of “Statement of Reorganization”.

March 7, 2016 Nasdaq added Investor Type fields to NFN Daily List and NFN Directory files. Field is intended to help NFN pricing agents to identify which instruments fall under the SEC Money Market Reform Act reporting requirements.

February 6, 2017 As of March 6, 2017, Nasdaq will add the following values to Instrument Registration field:

Code	Value
C	U.S. Commodity Futures Trading Commission (CTFC)

NFN Daily List

X	SEC Registration Exemption
N	Not Registered with U.S. Regulatory Agency

As of May 15, 2017, Nasdaq will add the following values to Instrument Code field:

Code	Value
Y	Interval Fund
Z	Business Development Company (BDC)

April 25, 2017

For NFN Documentation List, Nasdaq added Document Type Private Placement Memorandum.

November 20, 2017

As of November 20, 2017, Nasdaq will add a new field Instrument Class. This field denotes the share class for each instrument.

January 29, 2018

As of January 29, 2018, Nasdaq will release a new Root Symbol field. The Root Symbol is an identification for a fund that encompasses all share classes within the fund.

March 26, 2018

As of March 26, 2018, Nasdaq will add the following values to Instrument Registration field:

Code	Value
O	Other

For NFN Documentation List, Nasdaq added Document Type Marketing Materials, and The Declaration of Trust.

Nasdaq will add the following to the existing Instrument Type field:

Code	Value
CT	Collective Investment Trust
MA	Managed Accounts
SA	Separate Accounts
HF	Hedge Fund

As of March 26, 2018 Nasdaq will add the following to the existing Instrument Type field:

Code	Value
1	Collective Investment Trust
2	Separately Managed Accounts (SMA)
3	Unified Managed Accounts (UMA)
4	Separate Accounts

June 6, 2018

Integration of rebranding of Mutual Fund Quotation Service (MFQS) to Nasdaq Fund Network (NFN).

As of August 20, 2018, Document name change, removing MFQS from all web service downloads.

Addition of the Root Directory Specification.

NFN Daily List

Updated the URL Address statements to use <https://nfn.nasdaq.com> (rather than <https://www.nasdaqMFQS.com>).

As of August 20, 2018, new Instrument Code added to Money Market Fund Instrument Type:

Type	Code	Value
DD	5	Demand Deposit Account

June 29, 2018

Added a symbol call option for the NFN Daily List and NFN Advanced Daily list. Customers now have the option to pull these files by symbol, and symbol with a date.

Updated end point calls to reflect the new URL.

September 6, 2018

Added the following fields to NFN Daily List and Symbol Directory:

New fields added to NFN Daily List	New fields added to Symbol Directory
Vehicle Legal Structure - Current	Vehicle Legal Structure
Vehicle Legal Structure - New	Instrument Performance
Instrument Performance - Current	Rebalance Frequency
Instrument Performance - New	GIPS Compliant
Rebalance Frequency - Current	Insured
Rebalance Frequency - New	Insured Amount
Number of Accounts	
Number of Accounts Date	
Assets Under Management	
Assets Under Management Date	
GIPS Compliant	
Insured	
Insured Amount	

January 10, 2019

Added Issuer Name field to Document Posting Service.

Added three new document types to the Document Posting Service: Proof of Total Net Assets, Summary Plan Description, and Other.

March 15, 2019

Added Issuer Directory specification.

September 9, 2019

Added Model Portfolio field to NFN Daily List, Symbol Directory.

Added Total Assets Under Management Date field to Issuer Directory.

Added Creation Date field to Document Posting Service.

Removed Assets Under Management and Assets Under Management Date from NFN Daily List, Symbol Directory.

October 31, 2019

Removed codes from all Root Fields with dropdown values.

Removed Headquarters field from Root

Change field names for the following fields in the Root Directory:

Old field names	New field names
Root Name	Product Name
