**Subject: Merrill Lynch & Co., Inc. STARS**

**Information on the Notes**

Merrill Lynch & Co., Inc. (the “Issuer”) has issued Strategic Accelerated Redemption Securities (“STARS”) linked to the S&P 500 Index (the “Index”). The STARS were priced at \$10 each and mature on May 4, 2010.

The STARS are senior, unsecured debt securities of the Issuer that provide for an automatic call of the STARS if the closing level of the Index on any observation date is greater than or equal to the Starting Value of the Index, as determined on the pricing date.

If the STARS are called on any observation date, investors will receive a payment of:

- If called in May 2009: \$11.0520 per unit
- If called in November 2009: \$11.5780 per unit
- If called in May 2010: \$12.1040 per unit

If the STARS are not called prior to the maturity date, then at maturity:

- If the Ending Value is greater than or equal to the Threshold Value (1,268.4060), then investors will receive per STARS:

\$10

- If the Ending Value is less than the Threshold Value (1,268.4060), then investors will receive per STARS:

$\$10 + [\$10 \times (\text{Ending Index Value} - \text{Threshold Value} / \text{Starting Value}) \times 1]$

The Starting Value of the Index equals: 1,409.34. The Ending Value of the Index will be determined close to the maturity date.

Please see the prospectus for the STARS for more details regarding the calculations. It is expected that the market value of the STARS will depend substantially on the value of the Index and may be affected by a number of other interrelated factors including, among other things: the general level of interest rates, the volatility of the Index, the time remaining to maturity, the dividend yield of the stocks comprising the Index, and the credit ratings of the Issuer.

Trading in the shares on ISE is on a UTP basis and is subject to ISE equity trading rules. The shares will trade from 9:00 a.m. until 4:00 p.m. Eastern Time. Equity Electronic Access Members ("Equity EAMs") trading the shares during the Pre-Market Session are exposed to the risk of the lack of the calculation or dissemination of underlying index value or intraday indicative value ("IIV"). For certain derivative securities products, an updated underlying index value or IIV may not be calculated or publicly disseminated in the Pre-Market hours. Since the underlying index value and IIV are not calculated or widely disseminated during Pre-Market hours, an investor who is unable to calculate implied values for certain derivative securities products during Pre-Market hours may be at a disadvantage to market professionals.

Equity EAMs also should review [NASD Notice to Members 03-71](#) for guidance on trading these products. The Notice reminds members of their obligations to: (1) conduct adequate due diligence to understand the features of the product; (2) perform a reasonable-basis suitability analysis; (3) perform customer-specific suitability analysis in connection with any recommended transactions; (4) provide a balanced disclosure of both the risks and rewards associated with the particular product, especially when selling to retail investors; (5) implement appropriate internal controls; and (6) train registered persons regarding the features, risk and suitability of these products.

**This Regulatory Information Circular is not a statutory Prospectus. Equity EAMs should consult the Trust's Registration Statement, SAI, Prospectus and the Fund's website for relevant information.**
