CART ROUTING STRATEGY

CART, a new routing strategy available on The NASDAQ Stock Market[®], enables firms to check the NASDAQ OMX BXSM (BXSM), NASDAQ OMX PSXSM (PSXSM) and NASDAQ[®] books before optionally posting to the NASDAQ book. The CART strategy minimizes latency by allowing members to check all three NASDAQ OMX[®] equity markets in the Carteret data center with a single order message.

* Referenced pricing is effective for stocks priced above \$1.00. NASDAQ reserves the right to change routing destinations upon notice based on objective review of market conditions.
